Subject: text for our acrylonitrile assessment.....moving forward without RI data used quantitatively

John:

As you know, we recently announced via a press release moving forward with our IRIS assessment for acrylonitrile. There are RI data that support early-life susceptibility for cancer that we had used both qualitatively and quantitatively in our assessment. We stopped the assessment just prior to public comment and external peer review and are now moving forward.

Deliberative Process / Ex. 5

Last question---we can't find the report on the internet...did you ever release it? We anticipate being asked for the report by our Agency reviewers, interagency reviewers and the public.

Thanks John---
Lynn
